

“Newsletter”

We are pleased to announce that we have received the patent certificate for the core part of our CO2 processing technology, "CCUDM", for CO2 disposal.

The technology will be applied in natural gas fields as a first project plan. And, It can accommodate fitting to thermal power plants and chemical plants in future accordingly.

We are determined to make this technology one of the new generation of Emission Technologies and contribute to the world's decarbonisation.

CERTIFICATE OF PATENT

PATENT NUMBER 6905693

PATENT NUMBER 6905694

TITLE OF INVENTION : Carbon dioxide disposing method and the aqueous dispersion used in it (both patent)

PATENTEE : Jonquil Consulting inc.
